

Harvesting the Vegetables.

Wow just look at the size of some of these carrots.

We are going to use the radishes to make salad.

This year the Year One children together with their buddies in Year Six have been planting and looking after the school vegetable garden. We harvested the vegetables today all ready for our big feast on Friday when the Year Six children are going to be cooking us lunch using the produce from the garden.

It was like digging for buried treasure trying to find the potatoes.

We harvested carrots, leeks, potatoes, broad beans, broad beans, beetroot, radishes, some herbs, siverbeet, lettuce and peas.

The Vegetable Garden.

We are amazing and we look very happy with ourselves.

Lisa and Hannah set to work shelling the broad beans. Luckily there were lots of helpers.

Angie looks very happy helping out.

Some of the boys are pretending that the broad beans are a moustache.
